**BTECH**  
**(SEM III) THEORY EXAMINATION 2024-25**  
**ELECTROMAGNETIC FIELD THEORY**

TIME: 3 HRS

M.MARKS: 100

Note: Attempt all Sections. In case of any missing data; choose suitably.

## SECTION A

1. Attempt *all* questions in brief.

2 x 10 = 20

Q no.	Question	CO	Level
a.	Convert the point (2,6,3) into a spherical coordinate system.	CO1	K <sub>2</sub>
b.	Compute the gradient of the scalar field $f(x, y, z) = x^2 + y + z$ at point (2,0,1).	CO1	K <sub>2</sub>
c.	List the type of charge distribution with examples.	CO2	K <sub>2</sub>
d.	Describe how $\vec{E} = -\nabla V$ , where E and V denote electric field and electric potential respectively.	CO2	K <sub>2</sub>
e.	Define Lorentz's law of force.	CO3	K <sub>1</sub>
f.	State that the $\oint B \cdot ds$ is zero in a static magnetic field	CO3	K <sub>1</sub>
g.	Describe magnetic moment.	CO4	K <sub>2</sub>
h.	State ampere's circuital law in a static magnetic field.	CO4	K <sub>1</sub>
i.	Explain the physical significance of the Poynting vector.	CO5	K <sub>2</sub>
j.	A conductor of 1m length is moved with a velocity of 100 m/sec perpendicular to a field of 1 Tesla. Compute the value of e.m.f induced.	CO5	K <sub>2</sub>

## SECTION B

2. Attempt any *three* of the following:

10 x 3 = 30

Q no.	Question	CO	Level
a.	Given vector field $\vec{G} = 8\sin\phi a_r$ , is in spherical coordinate, modify it into the cylindrical and rectangular coordinate system.	CO1	K <sub>3</sub>
b.	Determine the electric field in space due to charged finite length wire having uniform charge density.	CO2	K <sub>3</sub>
c.	Explain Biot-Savart's law for magnetic fields. How can this concept be used to determine the magnetic field in space due to a closed-loop current-carrying wire?	CO3	K <sub>4</sub>
d.	Verify that magnetostatic energy is given by $W_n = \frac{1}{2} \int \mu H^2 dv$	CO4	K <sub>5</sub>
e.	Determine the solution of the plain wave equation in a conducting medium. (lossy dielectric)	CO5	K <sub>3</sub>

## SECTION C

3. Attempt any *one* part of the following:

10 x 1 = 10

Q no.	Question	CO	Level
a.	Derivethe Gauss divergence theorem.	CO1	K <sub>3</sub>
b.	Examine the gradient of any scaler V and divergence and curl of any vector $\vec{A}$ in different co-ordinate systems	CO1	K <sub>3</sub>

Roll No:

**BTECH**  
**(SEM III) THEORY EXAMINATION 2024-25**  
**ELECTROMAGNETIC FIELD THEORY**

TIME: 3 HRS

M.MARKS: 100

4. Attempt any *one* part of the following:

10 x 1 = 10

Q no.	Question	CO	Level
a.	A potential field in free space is expressed as, $V = \frac{60 \sin \theta}{r^2}$ volt. Determine the electric flux density and hence the volume charge density at the point ( $r=3\text{m}$ , $\theta = 60^\circ$ , $\phi = 25^\circ$ ) in spherical coordinates.	CO2	K <sub>3</sub>
b.	Explain the concept of energy stored and energy density in static electric field.	CO2	K <sub>4</sub>

5. Attempt any *one* part of the following:

10 x 1 = 10

Q no.	Question	CO	Level
a.	Derive the expression of magnetic field for an infinitely long coaxial transmission.	CO3	K <sub>3</sub>
b.	Determine the magnetic flux density B at a distance of d meter from an infinite straight wire carrying current I. Also, the flux density when the wire is semi-infinite.	CO3	K <sub>3</sub>

6. Attempt any *one* part of the following:

10 x 1 = 10

Q no.	Question	CO	Level
a.	Explain the concept of magnetization and susceptibility.	CO4	K <sub>4</sub>
b.	Derive an expression for the inductance of solenoid and toroid.	CO4	K <sub>3</sub>

7. Attempt any *one* part of the following:

10 x 1 = 10

Q no.	Question	CO	Level
a.	Derive and state the Poynting theorem for EM wave.	CO5	K <sub>3</sub>
b.	Derive an expression of characteristic impedance and propagation constant for a general and lossless transmission line.	CO5	K <sub>3</sub>
