B.Tech.

(SEM. VI) THEORY EXAMINATION 2010-11

**NON-CONVENTIONAL ENERGY RESOURCES &
UTILIZATION**

Time : 2 Hours

Total Marks : 50

- Note : (i) Attempt all questions.
(ii) All questions carry equal marks.
(iii) Be precise in your answer.

1. Answer any two of the following : (5×2=10)
- (a) What do you mean by renewable energy sources? Explain in brief these energy sources in Indian context.
- (b) Explain the following angles used in solar radiation analysis.
- (i) Latitude of location
(ii) Hour angle
(iii) Solar Azimuth angle
(iv) Zenith angle
(v) Declination angle.
- (c) (i) Discuss decentralised & dispersed generation.
(ii) Explain local apparent time. How it is calculated?
2. Answer any two of the following : (5×2=10)
- (a) Enumerate different types of concentrating solar collector.
- (b) Describe the working of a solar power plant.
- (c) What is the principle of solar photovoltaic power generation? Describe in brief main elements of PV system.

[Turn Over

3. Answer any two of the following : (5×2=10)
- (a) How does biomass conversion take place ? Name various models of biogas plant & describe any one of them.
 - (b) What are the criteria for site selection of a wind mill farm ? Discuss advantages of vertical axis wind mill over horizontal type.
 - (c) Write short notes on :
 - (i) Wind energy storage.
 - (ii) Dome type biogas plant.
4. Answer any two of the following : (5×2=10)
- (a) Explain the basic principle of fuel cell with reference to H_2-O_2 fuel cell. What are advantages of fuel cell power sources ?
 - (b) Explain the working of single basin & double basin tidal system.
 - (c) Briefly describe different methods for hydrogen production. What are the problems with hydrogen as fuel ?
5. Answer any two of the following : (5×2=10)
- (a) Write a note on "Utilization of Geothermal Resources in India". What are the merits & demerits of geothermal energy.
 - (b) What are the main types of OTEC power plants. Describe the working of anyone type in brief.
 - (c) Explain Kyoto Protocol agreement for reduction of greenhouse gases.
