

- (c) Write manual NC part program to drill holes in a plate of thickness 10 mm as shown in Fig (1). Speed = 540 rpm and feed rate is 1 mm/min.

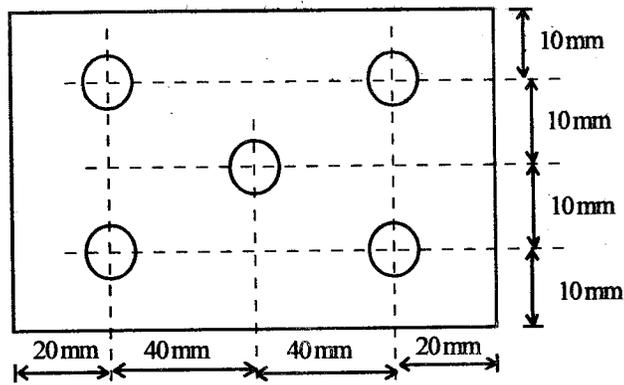

Fig.1

3. Attempt any **two** parts of the following questions : **(2×10=20)**
- State the working principle and applications of :
 - Digital to analog convertor
 - Stepper motor.
 - Explain with the help of a diagram, the principle and working of circular interpolator.
 - Discuss the construction and working principle of LVDT.
4. Attempt any **two** parts of the following questions : **(2×10=20)**
- What is group technology ? How is it useful in FMS ?
 - Explain the CAPP briefly.
 - What is CIM ? Mention various elements of CIM.

5. Attempt any two parts of the following questions : (2×10=20)
- (a) Compare between NC machines vs robots. Also briefly write types and generations of robots with applications.
 - (b) What is artificial intelligence ? Discuss various elements of artificial intelligence.
 - (c) What is a robot ? How is it classified based on manipulator ?
