**B. Tech.****(SEM. VIII) EXAMINATION, 2008-09****NON-CONVENTIONAL ENERGY  
RESOURCES & UTILIZATION***Time : 3 Hours]**[Total Marks : 100*

- Note :**
- (1) Attempt all questions
  - (2) All questions carry equal marks.
  - (3) Be precise in your answer.
  - (4) No second Answer Book will be provided.

1 Answer any **two** of the following : **10×2=20**

- (a) Discuss the primary and secondary energy sources. Also describe the future of non-conventional energy sources, in India.
- (b) Define the terms:
  - (i) Altitude angle
  - (ii) Incident Angle
  - (iii) Zenith angle
  - (iv) Latitude angle
  - (v) Hour angle
- (c) Differentiate between beam and diffuse radiation. Describe a type of instrument to measure beam radiator with a neat sketch.

- 2 Answer any **four** of the following: **5×4=20**
- Explain the principle of conversion of solar energy into heat. Explain a flat plate solar collector.
  - Enumerate the different types of concentrating type collector.
  - Classify the solar energy storage system.
  - What is meant by solar pond? Explain.
  - Describe the working of solar power plant.
  - Describe a continuous solar cooling system.
- 3 Answer any **four** of the following; **5×4=20**
- How bio-mass conversion takes place?
  - Explain the process 'photosynthesis'. What are the conditions which are necessary for it?
  - How are biogas plant classified? Explain them briefly.
  - What are the basic principles of wind energy conversion?
  - How are wind energy conversion system classified? Discuss in brief.
  - Describe horitontal axis type aero-generator.
- 4 Answer any **two** of the following: **10×2=20**
- What do you understand by fuel cell? How fuel cells are classified? Describe an  $H_2-O_2$  fuel cell with a sketch showing reactions.
  - What do you understand by thermionic emission effect? Derive the expression for power and efficiency of a thermionic generator.
  - Write notes on:
    - Limitations of Tidal Energy Conversion System
    - Safety precautions of hydrogen as fuel

5 Answer any **two** of the following: **10×2=20**

- (a) Describe the working of a Thermo-electric generator. Derive an expression for its power output.
  - (b) Describe a geothermal field from which geothermal steam is obtained through hot springs. What are the prospects of geothermal energy in context to India?
  - (c) Describe the basic principle of ocean thermal energy conversion system. Enlist the various plants based upon it. Describe an OTEC plant.
-
